ABOUT MYSELF

I am a creative and versatile Graphic Designer, striking a rare balance between analytical thinking and artistic vision. After earning a technical diploma, I began my academic journey in Engineering, where I developed a methodical, problem-solving mindset. However, my passion for visual communication led me to pursue graphic design, diving deep into vector graphics software and discovering the potential of design as a universal language. Over the years, I have worked on numerous projects in branding, illustration, and graphic layout, collaborating with businesses and private clients to craft visual content that blends aesthetics with strategy. These experiences have sharpened my ability to understand client needs and translate them into impactful visual solutions. To expand my skills, I completed a Master's program in Computer Graphics at BigRock, where I explored advanced techniques in both 2D and 3D design, solidifying my adaptability in this everevolving field. I thrive in collaborative environments, always eager to contribute fresh ideas and take on new creative challenges. Combining creativity, precision, and an innovative spirit, I am committed to transforming every project into a unique and memorable visual experience.
